A little bit of red goes a long way...

Lourika's favourite colour is red, and getting married in February she felt that the colours, décor and flowers should reflect a time of life and abundance at their summer wedding.

Cream brocade table linen with red glasses, red Lindt chocolates, red roses and a 'damask' print on a red background for the table seating and menu set the scene. The only thing left was to add the colour to her dream dress—red lining and red shoes! Everything was as perfect as it was in her dreams, every little detail was taken care of and best of all, beside her was the man she loved the most.

There were no cost implications, but plan your budget carefully, be realistic about it and spend money on the things that are important to you, bringing in your 'magic' element.
